### Chairmans' Roundtable: California Transportation Center of Excellence

*Sponsored by Union Pacific Railroad*

Agencies across the nation look to California as the transportation center of excellence. With world-class innovation and technology at our fingertips, juxtaposed with the highest clean energy and air quality goals, and nearly half of our nation's goods traveling in freight trucks and trains crisscrossing our region ... how will our region focus our efforts? How can the agencies collaborate and define the path forward? What are the key challenges and what is at stake? Join us as the political leaders of our Southern California regional transportation agencies exchange ideas, predictions and solutions, and discuss how they will transform California into a transportation center of excellence!

### Reality of an Autonomous Transportation World

*Sponsored by ADVANTEC Consulting Engineers, Inc.*

While there is significant hype in the media regarding driverless vehicles, California is making meaningful progress with proactive, forward-thinking policies, testing and operations. Most importantly, driverless technology is being incorporated into many agencies' plans and operations in a way that aligns with transportation goals and the rapidly shifting policy landscape. The purpose of this session will be to skip the hype, focus on best (and real) practices today, and share practical driverless autonomous vehicle project and policy examples. Join us as our distinguished speakers provide their expert insights into how shared, electric, connected and autonomous transportation will impact our infrastructure, jobs and economy ... entirely changing the culture and landscape of mobility.

# MORNING BREAKOUT SESSIONS

10:45 AM - 11:45 AM

## Morning Concurrent Breakout Session 3

*Diamond 7-8*

### Microtransit is Changing the Future

*Sponsored by Tetra Tech*

As traditional transportation options age out and new options flood the market, agencies are diligently working to manage the public's expectations and deliver innovative, cost-effective and sustainable solutions to connect the traveling public from point A to point B. Microtransit has emerged as the front runner of innovation and choice as a premium, on-demand transit service where riders can be picked up and dropped off where they want using mobile payment. It is currently being deployed in several major metropolitan areas throughout our country, including California. Join us as our experts discuss this new segment in transportation and how it is creating a new pipeline of projects for our industry and enhancing our systems and service to the public.

### Aviation Innovation and the Passenger Experience

*Sponsored by Guida Surveying, Inc.*

Airports are continually striving to improve the passenger experience and incorporate rapidly evolving new technology for the traveling public. As aviation travel has increased over the decades, public expectations have risen for all in the transportation community to work together to meet the needs of those utilizing airports, ensuring coordination with other modes of travel. This panel will discuss how Southern California's leading aviation experts are meeting the challenges of connecting our infrastructure, what can be learned from facilities around the world, and how, by incorporating innovative technology, airports can meet these challenges far into the future.

#### **Finding a PATH Home: Transportation and Homelessness**

PATH, People Assisting the Homeless, is an organization that has been helping connect people to permanent housing through voluntary supportive services for over 30 years. With more than 25 locations throughout California, services in more than 140 cities, and more than 1,000 units of permanent supportive housing completed or in the pipeline, PATH is on the front line in counteracting the ever-increasing issue of homelessness. Transportation agencies across the state have seen a rise in homelessness in and around their systems. Hear from PATH's Tescia Uribe, Chief Program Officer, about the organization's success stories of homeless survivors and the collaboration and comprehensive outreach at the state and local levels to connect housing and services with the homeless sheltering in our transportation systems.

# AFTERNOON BREAKOUT SESSIONS

### What's the Big Deal with Big Data?

*Sponsored by TRC Solutions*

For decades, companies have harnessed big data and leveraged analytics to solve complex problems ... think Google Maps as just one prime example of using civic data combined with innovation for incredible public benefit. How do these types of big data innovations translate into solutions for transportation? How can we bring big data to the table to leverage a multitude of data sources and deliver essential benefits to our regional and local agencies in Southern California? Join us as our expert panelists from across the U.S. demonstrate how big data equals big savings in time and money for agencies and big benefits to the public.
